

To Whom It May Concern,

I am writing this letter to highly recommend Jordan Duffey, who has been a software development engineer at Pomarium since June 2024 to today. I cannot speak highly enough of his contributions during his time with us, and had we been able to secure future rounds of funding, I would have not only kept Jordan on staff but would have also promoted him as a key leader within our development organization. I am confident he would have continued to grow and make a lasting impact.

Jordan consistently impressed us with his ability to rise to any challenge. No matter the complexity of a task, he was always eager to dive in, find solutions, and contribute at a high level. We regularly brought him into product discussions because his technical feedback was invaluable, and he was able to offer insights that bridged the gap between engineering and business needs. His unique background as a dentist gives him a distinct ability to communicate clearly and effectively, a trait that's rare among engineers. This skillset, combined with his strong technical acumen, allowed him to connect with people across the company, making him a truly exceptional team member.

As a startup, we often lacked clear direction, and requirements were frequently ambiguous. Jordan, however, could take complex, unclear ideas and break them down into manageable pieces. He was able to turn vague concepts into tangible products we could iterate on, helping us move forward even when we didn't have all the answers. His contributions in this area were key to keeping our development on track.

Jordan is an incredibly talented developer with a passion for problem-solving and learning. I am confident he will be an asset to any organization he joins, and I have no doubt he'll continue to grow into a strong technical leader. If you have any questions or would like more details about his work, please feel free to reach out. I'm more than happy to share my experiences working with him.

Thank you for considering my recommendation for Jordan, I am eager to see where his engineering career leads him and am excited to watch him rise.

Sincerely,

Libby Sparks
Director of Operations
Pomarium
